

# TFC Irrigation Remotes

Installation Instructions for Hunter DCI-1-H Connector

**CAUTION – DISCONNECT POWER FROM THE CONTROLLER PRIOR TO INSTALLING THE DCI-1-H CONNECTOR**

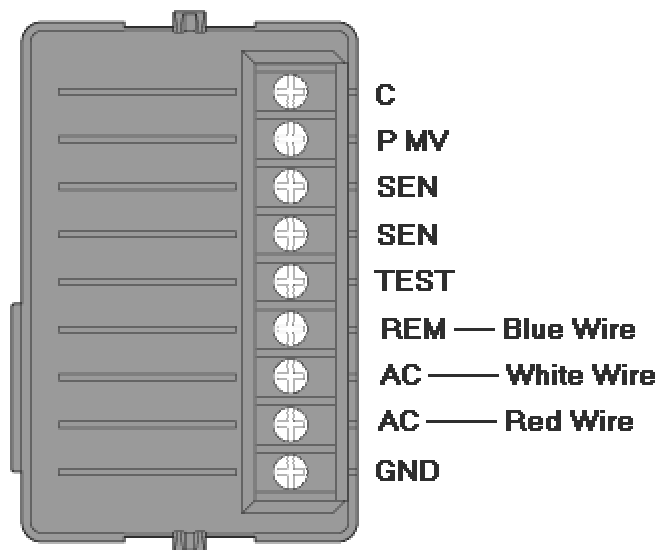

Connect the three wires to the terminals of the power module on the left side of the controller above the transformer as follows.

The Blue wire is connected to the terminal marked “REM”

The White wire is connected to the terminal marked “AC”

The Red wire is connected to the terminal marked “AC”

If you receive an “ERR” message on the LCD display of the controller after wiring the connector as shown, then reverse the positions of the White and Red wires.
